Princess R35 - Experience the revolution

Provocative, cutting edge, exhilarating - announcing the highly anticipated, all-new R Class.

Born out of a desire to synthesise the Princess experience with technologies, materials and techniques that push the boundaries of nautical engineering, the R Class is our range of high performance sports boats. The highly anticipated R Class offers the seduction and exhilaration of a new class of cutting-edge yachts: 35 feet long, all carbon fibre, V8 engine propulsion, 50 knots top speed.

This revolutionary yacht remains true to the spirit of the house, with the comfort, practicality and seaworthiness of other Princess yachts combined with the latest innovations from the Princess design studio and futuristic performance technologies. The new Princess R35, a yacht in a whole new class.

Equipment

In partnership with BAR Technologies and Pininfarina, Princess Yachts has developed an entirely new class of yacht, featuring cutting-edge technology and the latest in naval architecture. The new R Class will be equipped with the unique Princess Active Foil System (AFS), for an even faster and more efficient Princess sailing experience. The stunning exterior design is one of our most attractive and innovative creations. It houses a spacious interior cabin, with a full galley, a saloon that converts to a generous double berth for maximum flexibility and an en-suite bathroom.
